TEKER/CODES

Baurel

Junior frontend & software developer

DOUALA, CAMEROON BAURELBEMMO@GMAIL.COM +237 656 384 260 HTTPS://GITHUB.COM/BAUREL237

PROFILE

I work with React and Next.js to build readable, responsive and accessible interfaces. On the server side I develop REST APIs with Java and Spring Boot: entity modelling, services, controllers, data validation and PostgreSQL persistence.

SKILLS

Frontend — HTML, CSS, JavaScript, React, Next.js, Tailwind CSS, Bootstrap

Backend — Java, Spring Boot

Data — PostgreSQL, SQL

Tools — Git, GitHub, Linux

PROJECTS

DepensePro

Expense management application built on a complete REST API: entities, services, controllers and data validation.

JAVA · SPRING BOOT · API REST · POSTGRESQL

Personal portfolio

Showcase site built with Next.js and Tailwind CSS: reusable components, responsive layout and section navigation.

NEXT.JS · TAILWIND CSS · REACT

EDUCATION

Self-directed learning · Ongoing

Learning by building: Java and Spring Boot REST APIs, React and Next.js interfaces, with regular project releases on GitHub.

GOALS

Join a product team — Contribute to a production application, with code reviews and a real standard of quality.

Deepen the backend — Go further with Java and Spring Boot: security, automated tests and application architecture.

Contribute to open source — Take part in existing projects and document my own work so it can be reused.
